

Dear FCC:

I urge you to reject the NAB's petition 04-160. I am an XM subscriber and consider the instant traffic and weather a major benefit. XM provides me with programming and variety that is not available on regular commercial AM or FM radio. I believe the NAB is trying to use this petition to fight their competition. It is the broadcasters limited formats and limited programming within those formats that led me to subscribe to XM. Please encourage the broadcasters to fight the competition from satellite radio by re-examining their own programming, not using the government to protect their business.
